

Claims

- [c1] A system for a shopping cart liner for use with shopping carts, said shopping cart liner comprising:
 - a cart basket liner;
 - a child transport area liner in communication with said cart basket liner; and
 - a cart handle liner in communication with said cart child transport area liner.
- [c2] A system according to claim 1, comprising a carrier handle.
- [c3] A system according to claim 1, comprising a drawstring, said drawstring affixed to said cart basket liner.
- [c4] A system according to claim 3, wherein said drawstring includes a drawstring fastener.
- [c5] A system according to claim 1, wherein said cart basket liner comprises at least one tab for affixing said cart basket liner to the shopping cart.
- [c6] A system according to claim 5, wherein said cart basket liner tab is removable from said cart basket liner.

- [c7] A system according to claim 1, wherein said cart handle liner comprises a tab for affixing said cart handle liner to the shopping cart.
- [c8] A system according to claim 4, wherein said cart handle liner tab is removable from said cart handle liner.
- [c9] A system according to claim 1, wherein said cart basket liner comprises a carrier handle.
- [c10] A system according to claim 1, wherein said cart basket liner comprises at least a basket front liner portion, a basket back liner portion, a basket side liner portion, and at least a first gusset connecting said basket front liner portion to said basket side liner portion, and a second gusset connecting said basket back liner portion to said basket side liner portion.
- [c11] A system according to claim 1, wherein said shopping cart liner is removable from the shopping cart.
- [c12] A system according to claim 11, wherein said shopping cart liner is convertible into a shopping bag for transporting articles.
- [c13] A system according to claim 1, wherein said shopping cart liner is comprised of substantially nonporous material.

- [c14] A system according to claim 1, wherein said shopping cart liner is comprised of at least one of a plastic material, paper product, and fabric material.
- [c15] A system according to claim 1, wherein said shopping cart liner is comprised of a printable material.
- [c16] A system for a shopping cart liner for use with shopping carts, said shopping cart liner comprising:
 - a cart basket liner; and
 - a child transport area liner in communication with said cart basket liner.
- [c17] A system according to claim 16, wherein said cart basket liner comprises a carrier handle.
- [c18] A system according to claim 16, wherein said shopping cart liner is removable from the shopping cart.
- [c19] A system according to claim 16, wherein said shopping cart liner is convertible into a shopping bag for transporting articles.
- [c20] A system according to claim 16, wherein said shopping cart liner is comprised of substantially nonporous material.
- [c21] A system according to claim 16, wherein said shopping

cart liner is comprised of at least one of a plastic material, paper product, and fabric material.

[c22] A system according to claim 16, wherein said shopping cart liner is comprised of a printable material.

[c23] A method for shielding articles transported in a shopping cart from contacting the shopping cart surface, the method comprising:
providing a shopping cart liner operable to substantially cover a shopping cart basket, a shopping cart child transport area, and a shopping cart handle, wherein the shopping cart liner is removable from the shopping cart and convertible into a shopping bag for use in transporting the articles.

[c24] A method for shielding articles transported in a shopping cart from contacting the shopping cart surface, the method comprising:
providing a shopping cart liner operable to substantially cover a shopping cart basket, and a shopping cart child transport area, wherein the shopping cart liner is removable from the shopping cart and convertible into a shopping bag for use in transporting the articles.

[c25] A method for shielding articles transported in a shopping cart from contacting the shopping cart surface, the

method comprising:

providing a shopping cart liner operable to substantially cover a shopping cart basket, and a shopping cart child transport area, wherein the shopping cart liner is operable to display notices.
